Construction Notice

220th Street SW Overlay, City of Edmonds

Street Overlay and Bike Lane Project

(Edmonds - WA) Construction for the 220th Street Overlay Project will commence August 31, 2015, and continue through approximately the end of October.

The project involves a full-width roadway grind and 2-inch overlay with new pavement between 84th Avenue and 76th Avenue. Typical work hours for this section of paving will be Mon-Fri from 7am to 5pm. The project will also add bike lanes on 220th Street to connect to the existing bike lane network east of 84th Avenue. Adding bike lanes will modify the existing lane configuration and reduce on-street parking within the project limits. Pedestrian curb ramps will be upgraded to comply with the current American with Disabilities Act (ADA).

In September, the City's street overlay program will continue the pavement rehabilitation work on 220th Street from 76th Avenue eastward to the Interurban Trail. The work east of 76th Avenue will be night work.

Intermittent traffic delays can be expected, but residential, pedestrian, and business access will be open throughout the project.
