CONSTRUCTION NOTICE

Low Impact Development Stormwater Project in Southwest Edmonds, Local Street Closure Expected

Infiltration Facility to Reduce Downstream Impacts

Construction for the 105th / 106th Avenues West Low Impact Development Stormwater Infrastructure Improvements Project will commence the week of July 11th, and continue to approximately the beginning of September, 2016.

Funded in part by the Washington State Department of Ecology, this \$492,000 project will replace the stormwater infrastructure serving 105th and 106th Avenues between 226th and 228th Streets in southwest Edmonds, which currently consists of several hundred feet of failing pipeline routed through private property. The project includes installing storm piping, catch basins, and manholes within the streets to collect the runoff, and routing it through two water quality units before releasing it into a stormwater infiltration gallery under 228th Street.

Intermittent traffic delays can be expected, and 228th Street between 105th and 106th Avenues will be closed during construction. Residential and pedestrian access will be open throughout the project.

For questions or comments, please contact Ed Sibrel, Capital Projects Manager, at (425)771-0220 or via e-mail at ed.sibrel@edmondswa.gov.
